

Access your security system from any touch-tone phone in the world.

ADEMCO's Vista Interactive Phone Module (VIP) lets you arm, disarm and check the status of your security system, from any touch-tone phone—in your home, at work, or anywhere at all.

Vista Interactive Phone Module

*The VIP lets you take
remote control of your
system...and the rest of
your home environment!*

Offering your family enhanced convenience, control, and peace of mind

Utilizing its large vocabulary, the VIP actually describes the status of security zones to you. Then it suggests what action you should take. The VIP can provide home automation benefits, too, letting you remotely turn lights on and off, and control heat, air conditioners and other appliances.

You value most.*

**ADEMCO
GROUP**

Vista Interactive Phone Module

Since our founding nearly 70 years ago, the ADEMCO Group has helped shape the security industry. As the world's largest designer and manufacturer of electronic security systems, ADEMCO produces over 1,500 different products. We protect 15 million homes, businesses, museums and government buildings. With ADEMCO, you've selected the finest security solutions in the world to protect your home.

Designed for your comfort and convenience

- Turns every touch-touch phone, even a cellular phone, into a keypad
- Enables you to remotely arm, disarm and check status of your security system
- Allows remote control of lights and appliances; adjust heat and air conditioner settings when used with optional ADEMCO thermostat
- Provides detailed status of security zones and prompts actions, using large vocabulary
- Provides intuitive, high quality, menu driven, voice messages by phone; or in the home with optional ADEMCO speaker

Built to meet the highest standards in the industry

This product is ISO-9001 certified, an international standard of quality. In addition, the Vista Interactive Phone Module meets ADEMCO's rigorous standards of proven performance, reliability and cost-effectiveness.
